Master of Education in Technology in Education

One of Lesley's most popular programs, this M.Ed. is designed for teachers who want to integrate technology into their classroom or wish to pursue a technology leadership role in a school or district.

Orgena Alexander, '06

Benefits for Students

- Students learn to integrate technology into the curriculum. The content of the program is designed to reflect the curriculum they are teaching, helping to impact education immediately.
- Students acquire the technology component of a "highly qualified teacher."
- This program helps students gain expertise that can meet the state standards for their specific teaching position.
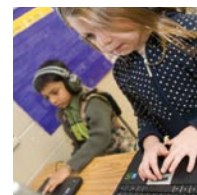

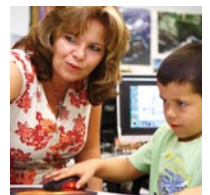

Skill Sets Learned

- Ability to integrate software tools into the curriculum at a sophisticated level, in an educational environment.
- Grant writing and the understanding of the "school of change" develop a teacher's ability to impact their technological community.
- Web design, video, and podcasts.

Project Types and Sample Projects

- Installing and running a software system into an old Windows-based computer.
- Training, customized software design, and use of PDA systems to teach children with disabilities.
- Webquest design projects.
- Use of network equipment.
- Create podcasts and videos for education purposes.
- Create classroom assessment tools using a variety of technologies.
- Teacher training in Remote Response Systems—Quizdom, Promethius, Activos.
- Grant writing.
- Create engaging and compelling presentations rich in images, sounds, animations, and movies.

The Technology in Education program addresses the current needs of the students we teach. Faculty keep abreast of national and state issues in the field of education such as NCLB, portfolio assessment, differentiated learning, critical literacy, state and national standards, and the use of technology and multimedia.

LESLEY UNIVERSITY   Let's wake up the world.[SM]   **School of Education**

About Lesley University:

Lesley University offers undergraduate and advanced degrees that prepare women and men to become leaders in education. The University is one of the largest providers of graduate education and teacher licensure in the U.S. with over 150 learning sites in 24 states.

The Technology in Education program is constantly monitoring changes in state and national standards to reflect changes in course objectives and project requirements.

One weekend a month cohort model:

With Lesley, students meet face to face, one weekend a month, studying together throughout the life of their program. Research indicates that the cohort model has proven to be very effective for professional development since it is long-term, experiential and inquiry-based.
